

3 WILDLANDS DOOR SIZES

3 sizes include: Full Size, Mid Size and Trailer Size.

SCREEN DOOR

features a stainless steel powder coated #6 woven mesh with .040 wire. #6 was chosen because it is the largest mesh that a grizzly cannot get a claw into. The door also features our fine mesh bug screen on the outside. This prevents pets from damaging the bug screen.

DOOR LOCK

Triple dead bolted lock system on a high security screen door. Lock shares the same European lock set as our cargo doors and other accessories, so everything can be keyed to match.

DOOR HANDLE

The single handle actuates all three latch points.

DOUBLE RUBBER SEALS

provides secure weather-tight seal.

DOOR FRAME

is all powder coated aluminum with heavy duty stainless steel latches.

SECURE LATCH

Attachments to the latches wrap around the inside of the wall, so that you would have to tear out the wall to pry out the door.

Trailer size

Trailer size

SLEEP IN SAFETY

with the outer door open in hot weather. The high security screen door locks independently.

INSULATED DOOR PANEL

Removable insulated thermal panel for four season use, as an option.

Mid size door with insulated door panel
